Usare il mandrino del tornio come fermo per il corretto posizionamento dell'anello.

Use the lathe chuck as a stop to correctly place the rings.

Man benutzt die Spindel der Drehbank als Haltevorrichtung für eine korrekte Positionierung des Rings.

Employer le mandrin du tour comme arrêt pour le positionnement correct de l'anneau.

De spaninrichting van de draaibank als arrest voor de juiste instelling van de ring gebruiken.

Utilizar el mandril del torno para sujetar el anillo en la posición correcta.

Ogni nodo deve essere bloccato con una goccia di colla molto piccola. Stendere una goccia di cianoacrilato su di un sacchetto di nylon di recupero ed intingere la punta del punteruolo per poter fissare il nodo, vedi foto 74.

Secure each knot with a small drop of glue. Put a drop of instant glue on a nylon bag and bath the point of a punch to fix the knot as illustrated in the photo 74.

Jeder Knoten muss mit einem winzigen Tropfen Leim befestigt werden. Man gibt einen Tropfen Sekundenkleber auf eine Nylontüte und tunkt die Spitze des Durchschlägers in den Leim, um so die jeweiligen Knoten zu fixieren, siehe Foto 74.

Chaque nœud doit être bloqué avec une petite goutte de colle. Étendre une goutte de cyanoacrylate sur un sachet de nylon de récupération et tremper la pointe du poinçon pour pouvoir fixer le nœud, voir photo 74.

Elke knoop moet met een kleine druppel lijm geblokkeerd worden. Een druppel van cyanoacrylaat lijm uitbreiden over een zakje nylon van recycling en de spits van de priem dopen om de knoop te kunnen bepalen, foto 74 zien.

Cada nudo debe bloquearse con una gota de cola muy pequeña. Extender una gota de cianoacrilato sobre una bolsita de nailon y mojar la punta del puntero para poder fijar el nudo, foto 74.

Come imbragare una lancia alla gru.
How to fast a boat to the crane.
Wie man einen Kutter an den Kran anseilt.
Comment fixer une embarcation à la grue.
Hoe een bootje vaststellen op de hijskraan.
Cómo eslingar una lancha con la grúa.

Nella Fig. 1 viene mostrato in prospettiva come una lancia dovrà essere imbragata in sospensione alle gru. Dal tirante (canapa nera o 0,75 mm) che congiunge i terminali di dette gru, partiranno una serie di cime (canapa o 0,25 mm) che finiranno arrotolate sui tavolati delle lance.

Fig. 1 shows, in perspective, how a launch must be suspended from a crane. From the braces (rope black o 0,75 mm), which support these cranes, must connect a series of lines (rope o 0,25 mm), which must finish coiled on the planking of the launches.

Abbildung 1 zeigt perspektivisch, wie ein Boot aufgehängt wird, das zu Wasser gelassen wird. Von den Brassen (takelgarn schwarz Garn o 0,75 mm), die diese Kräne stützen, müssen eine Anzahl Verbindungsleinen (takelgarn o 0,25 mm) weglaufen, die auf der Beplankung der Rettungsboote aufgerollt werden müssen.

Illustration 1: on montre en perspective comme on doit élinguer un canot en suspension aux grues. Du tirant (cordage noir o 0,75 mm) qui joint les terminaux de ces grues partira une suite de cable (cordage o 0,25 mm) qui finiront lovés sur les planches des canots.

Fig. 1. Toont, in perspectief, hoe een lancering moet gebeuren van de kraan. Vanaf de klemmen (zwarte touw o 0,75 mm), welke deze kranen steunt, wordt er een serie van lijnen (touw o 0,25 mm) verbonden, welke eindigd opgerold op de planken van de lanceer.

En la ilustr. 1 aparece en perspectiva cómo se deberá eslingar una lancha en suspensión con la grúa. Desde el tirante (hilo negro o 0,75 mm) que une las terminales de dichas grúas, saldrán una serie de cabos (hilo o 0,25 mm) que acabarán enrollados en el entablado de las lanchas.

Il posizionamento di ciascun tipo di imbarcazione a bordo della nave.

The placing of each type of boat on board the ship.

Die Anordnung der Rettungsboote am Schiff.

La place de chaque embarcation à bord du navire.

De positie van elk type boot aan boord van het schip.

La posición de cualquier tipo de embarcación a bordo de la nave.
